ZENTRON

ZENTRACE GUIDE

1. Turn on the device WiFi

- Long press the Menu button to enter the main menu
- Select the WiFi option
- Press the Menu button to turn on WiFi

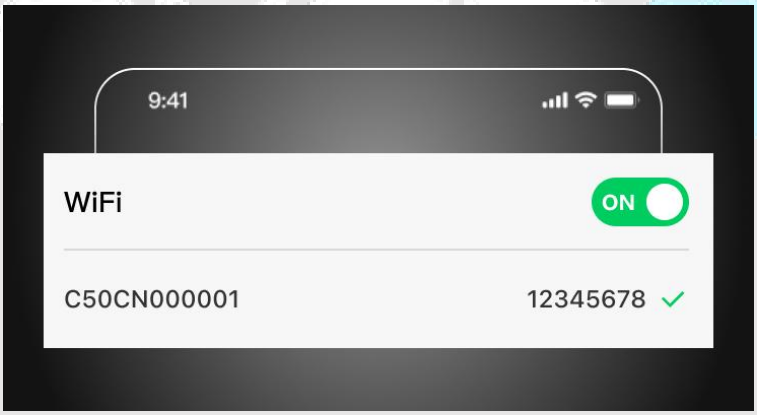
Note: Please remember the device's SSID, for example: C50CN000000. This will be the name of the device's WLAN (WiFi).

2. Connect the device to the ZSYNC App

Scan the QR code above or use the link below to download and install the ZSYNC App:

GooglePlay: https://play.google.com/store/apps/details?id=com.zentronusa.zsync

App Store: https://apps.apple.com/us/app/zsync/id6740468870

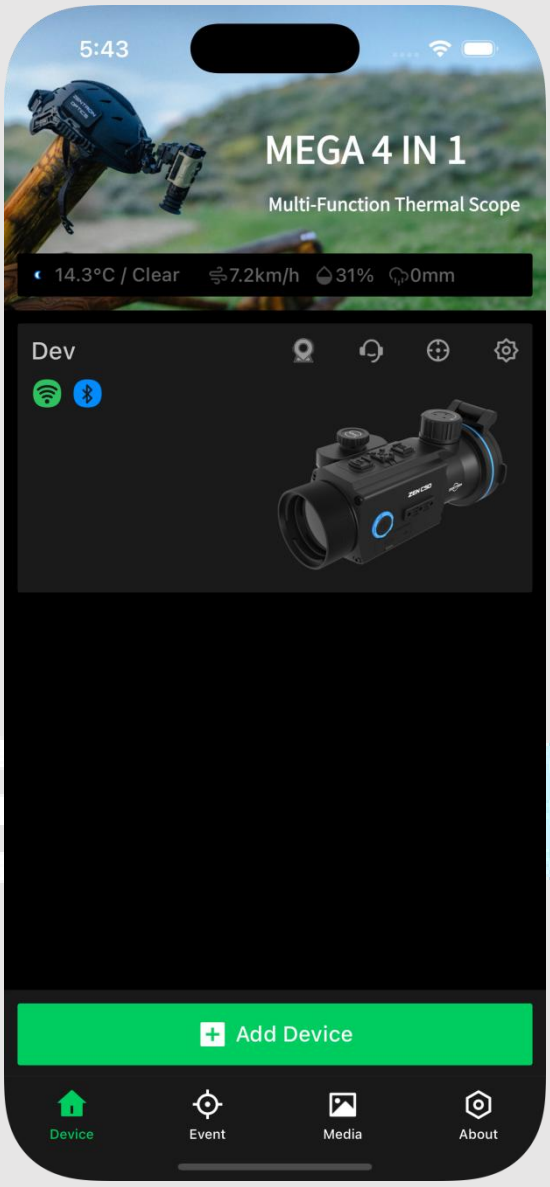


- Open your phone's WLAN (WiFi) settings, find the WLAN (WiFi) with the same name as the device's SSID, and connect.The default password is: **12345678**
- Return to the ZSYNC App and wait for the device to complete the connection.

3. Enable Device Bluetooth

- Turn on the Bluetooth switch.
- Select “ZenTrace” mode.
- Optional: Enable Bluetooth memory to automatically turn on Bluetooth at the next startup.

- Wait for the device to automatically connect to the app.



- When the Bluetooth icon turns blue, the device is successfully connected.

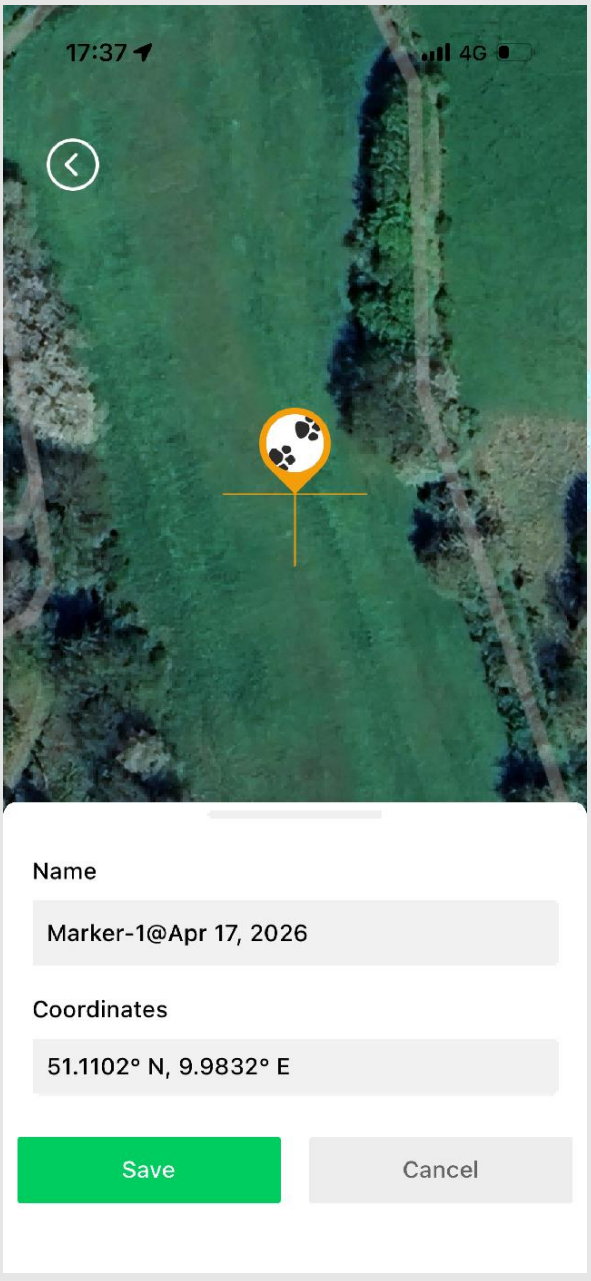
4. Access ZENTRACE Function

- In the app's device list, tap the function icon on the device card.

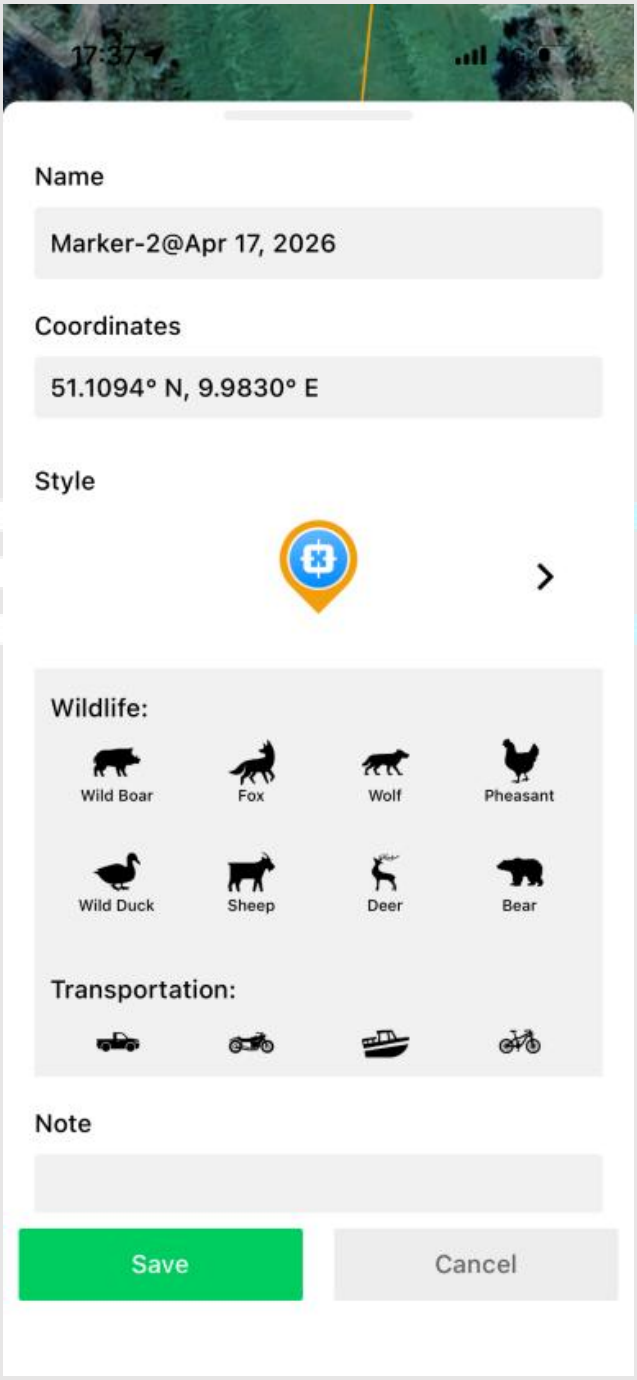
- Enter the function interface and ensure the phone's GPS, Bluetooth, and cellular data are enabled and functioning properly.

5. Operation Guide

- Manual Mode
- Tap the button at the bottom right corner of the screen to enter Manual Mode.
- You can manually mark target locations.



- Swipe up the pop-up panel to edit marker information.



- Auto Mode
- When the device is connected, a marker will be automatically generated upon firing.
- The marked location will be displayed on the map.
